THE TWO HEBREW spies sent by Joshua from Shittim to gain information of the military, political and economic potential of the Jericho area came to that city and entered 'the house of a harlot' (bêt 'iššâ zônâ) whose name was Rahab and stayed there temporarily. It is evident that the ruler of Jericho had been informed of their arrival and was able to send direct to her house with a demand that they be brought out. Rahab freely admitted that the men had entered but protested affirming that they had left the city by the main gate before sundown. This explanation was accepted as if her word was customarily trusted, as indeed it was by the spies themselves.

Rahab lived in a house on the city wall, perhaps near the main gate. She was also a recognized member of her family group, a status not normally granted to a prostitute. She is depicted as a member of an industrious household having a knowledge of affairs beyond the city and national borders.

A parallel may be found in the inn-keeper of Old Babylonian times. The inn (bît sâbî (ti)) was kept by a man or woman who was required to notify the palace of any stranger, especially one engaged in hostile activity, who might come to it. The laws of Eshnunna (§41) required the inn-keeper, who engaged in the conversion of commodities into local currency, to sell drink received from any foreigner, guest or temporary visitor, at the current

Wiseman: Rahab of Jericho
market rate. In her rôle as a female small broker, she was pro-
hhibited, as was the merchant-banker, from receiving for trading
silver, wool, barley or oil from any slave.\textsuperscript{11} Such transactions in
basic commodities were controlled by the palace since the 'inn' was
at this time the town's link with the economy of other tribes or
peoples. Since, by its nature, the inn as a place for trading in liquor,
could be the meeting-place for dissident elements, failure to report
their presence was punishable by the death of the inn-keeper.\textsuperscript{12}
One text tells of refugees, a physician and five cooks who, on
fleeing to Mari, stayed in the inn.\textsuperscript{13} Another, from the same city,
lists seven men and one woman by name as in the service of, or
owning, inns (\textit{bîtāt sābīt}).\textsuperscript{14}

It has been customary to translate the Akkadian \textit{sābītu} as
‘ale-wife, inn-keeper’ by comparison with the later Aramaic
\textit{sābā} ‘bar-man’ or \textit{sābōytā} ‘bar-maid’ yet the Babylonian \textit{sabūm}
means ‘to give drink’ rather than ‘to brew drink’.\textsuperscript{15} It is note-
worthy that the occupation of the \textit{sābītu}, and with it the role of the
inn, disappeared by the Middle Babylonian period (e.g. c. 1100
BC).\textsuperscript{16} Although this has been attributed to technical developments
which took the brewer’s craft out of the hands of women,\textsuperscript{17} it is
more likely that the decline is due to changes in the economic and
social structure of society. Foreign trade became increasingly the
direct concern of the palace and the terms for the inn’s patrons are
no longer found in the texts.\textsuperscript{18} Although the inns of this early
period, as at all times and places, were often immoral places, there
is no evidence that they were necessarily so.

This comparison with the Babylonian \textit{sābītu} would raise the
question of semantics. Can we find the precise meaning of the
Hebrew \textit{znh}? Josephus has Rahab not as a 'harlot' (\textit{zônâ}) but as
one who 'kept an inn' (\textit{καταγωγιον})\textsuperscript{19} and in this is followed by
the Targum and Midrash.\textsuperscript{20} While this could be attributed to the
nature of his apologia or be considered 'a distinction without a
difference'\textsuperscript{21} it is striking that \textit{zānā} can be defined as to 'have

\textit{Tyndale Bulletin} 14 (1964)
intimate or friendly dealings (not necessarily physical, but more frequently economic or spiritual) with alien persons or institutions'. Thus the zônâ is not one of a man's own family or kinship group, but comes from another group or non-Israelite tribe. It could be an activity of both men and women. The female zônâ is distinguished from the (cult-)prostitute. The exercise of znh was considered to have adverse effects on the economy as well as on international affairs. In a number of instances the description of a person as zônâ does not help in the definition of the term, e.g. the women judged by Solomon (I Ki. 3: 16). The reference to Jepthah the descendant of Gilead 'as a son of a zônâ', while within our description might also indicate that it was not necessarily a shameful ascription.

The most frequent use of zânâ is of a city, Jerusalem, Samaria (also Tyre) representative both of the citizens and of the territories of Judah or Israel having dealings (including trade) outside those permitted by the Torah. These were with foreign nations and probably involved treaty or covenant relationships. Assyria and Egypt are the most often named. A further use of the term, common in Hosea and Jeremiah, is to describe the association of Israelites with the deities of an alien land (Ex. 34:15; Dt. 31:16), with Moloch (Lv. 20:5), with 'satyrs' (Lv. 17:7) or with their shrines or cults.

The usual etymology of znh is given as the Arabic zana. This verb, however, used in the Quran only to describe illicit relationships of any kind outside the clan (ahl). In this sense Akkadian zânu is not found, despite earlier attempts to demonstrate a root * zânu, 'to fill' as distinct from sênu, 'to load, though

22 Lv. 21:14; a seeming exception in Jdg. 19:2 is to be rendered 'who hated him' (R.S.V.); cf. Laws of Hammurabi, § 142.
23 Ex. 34:16.
24 Gn. 38:21.
25 Lv. 19:29; Pr. 29:3.
26 Na. 3:4.
27 Cf. Ku-Bau, founder of the 4th Dynasty of Isin who claimed to be a sâbitu.
28 e.g. Is. 1:21 passim.
29 Ezek. 16:16.
30 Is. 23:25.
31 Ezek. 16 is a good example of this.
32 As Manasseh who was a vassal of Esarhaddon of Assyria (Iraq, XX, 1958, p. 4).
33 e.g. Je. 2:20. R. Gordis, H.U.C.A. XXV, 1954, pp. 9-35, argues that Gomer did not violate her marriage, but symbolized the national apostasy.
34 B.D.B., p. 275; The Aram. zn'.
35 E. S. W. Lane, Arabic-English Lexicon, I, London, 1867, p. 1260.
36 zânâ is used only of 'to overlay, decorate (with precious metal)'. In the light of the role of the sabún the Nuzi zannu is of interest as a dish or drink made of fomented beer (A.F.O., XVIII, 1956-7, p. 339; R.A., LII, 1958, p. 20).
37 Z.A., XVIII, 1903, p. 16.
the latter is now shown to mean 'to load, to heap up' (e.g. a ship, a table). 38 It is possible that znḥ 'to act in a friendly way to an enemy' (if the argument presented above is sound) may be a deliberate distinction from znḥ which is used in the sense of 'to act in an unfriendly way to one with whom there should be close friendship, i.e. to alienate'. 39

It is also possible that znḥ, in some of its earliest occurrences, as in the Rahab reference, may be a biform of zūn 'to provide food or sustenance' (Akkad. zanānu is used in this sense, as well as to provide a city or temple with means of support). 40 This is the meaning of māzūn in Genesis 45:23, which thus need no longer be considered a late Aramaism or gloss, and perhaps in the difficult Jeremiah 5:8 (Q̂r meyyuzzānum). The Hebrew zūn and znḥ should no longer be compared with a non-existent Akkadian zanānu—'to be full (of sexual desire). 41

All this does not imply that the traditional Christian, rather than Jewish, view that Rahab was 'a harlot' is necessarily wrong (cf. Jas. 2:35; Heb. 11:31). She is certainly an example of the Divine grace working through a sinful people. However, since much anti-Christian propaganda has been made of the unqualified description of Rahab, the ancestress of Jesus Christ (Mt. 1:5) as 'a harlot', 42 it seems well to indicate that the original need carry no more stigma than that she too was in a limited way a friend of 'publicans and harlots', that is of those owing allegiance to an alien power.

38 See now C.A.D., 16, p. 131.
39 As the Akkad. zenū.
40 zanānu C.A.D., 21, p. 43f.; zanānu—'to rain down' is a distinct word used in the same periods.
41 B.D.B., pp. 266, 276.
42 This is also often implied by the muslim description of Jesus as ibn Miriam, a mother's name is only given when the son is of unknown parentage, i.e. the father's name is not known, when the mother is a harlot.
